Turnaround Welding Services (TWS)

We provide turnaround services that go way beyond welding. Fact is, TWS offers full-service specialty welding and turnaround contracting, including a full complement of critical path resources to handle everything from planning and execution to turnarounds and fast track projects.

The resources to get the job done. Completely.

TWS has the resources to plan, estimate, budget, and forecast projects for our clients. Our planning and estimating group is so well-versed in turnaround work, their knowledge and real-world experience during the planning stage typically helps minimize costly downtime other contractors may overlook. On-time/on-budget is our way of life—that’s what 20+ years in the business teaches you.

The tech to streamline the process.

TWS has invested in technology to track and update our progress with welds, vessel repairs, bolt-ups, equipment closures and hydros. We’re also set up to manage a wide range of code repairs—from “S” Stamp for Power Boilers, to “U” and “R” Stamps for Repairs.

Safety comes first.

TWS has been recognized for our commitment to safety and has won numerous Houston Business Roundtable Safety Excellence and ISTC Safety Achievement awards.

Helping to provide employees and clients with an ultra-safe environment is a daily driving force at TWS. We see it this way: for our employees and our company to be successful, we must do everything in our power to deliver excellence through safety-oriented service. Ours is a hazardous

business—a company-wide commitment to safety is a requirement and a promise we take seriously, and personally.

Quality Control Program.

We believe in offering an elite Quality Control Program aimed at delivering a quality job far above industry standards. For our clients’ peace of mind, we employ a team of highly trained managers, QA/QC personnel, and supervisors who together have built one of the premier Quality programs in the industry.

Recruit and retain the best.

TWS achieves impressive results for our clients by helping to ensure highly qualified supervision, craft, and staff professionals are at every level of the organization. Our company culture is teamwork-based, downright family-like, with a variety of talented people performing a full range of specialty welding and turnaround contractor duties.
